- Regional policies (6)
- Game theory and applications (6)

Examination chosen by the student (6)

Final examination (24)

Presentation

Economists and public administrators face taking economic decisions that can be very complex.

This requires the expertise of professionals with a broad vision of economic and financial systems. This master's degree program is aimed at preparing economists with a strong theoretical and empirical foundation, which will equip them for the challenges of the public and private sectors.

Course content

This master's degree program offers economics, business, and legal courses for the development of rigorous and versatile analytic skills. Students interested in a theoretical approach will explore the economic behavior of principal stakeholders, such as families, and economic and financial institutions. Alternatively, students who prefer an applied approach, will be able to focus on the public sectors, program analysis and evaluation techniques.

Career options

Graduates will be regarded as "economic experts" and find employment within the following organizations: research departments of public and private institutions; trade or professional associations; credit institutions; local bodies and companies. Graduates can also apply for national and international PhD programs needed to cover high-profile roles within national and international economic organizations or to pursue a career in academia. Other career opportunities can be found in the field of applied economics. Graduates will be able to respond to

the needs of those institutions wishing to know whether their policies will attain the established objectives. Furthermore, they will be able to work as program evaluation experts within research centers; as planning and monitoring unit managers in public administration offices; as business experts and consultants for trade and volunteering associations, trade unions and foundations.

How to apply

- Register on the www.esse3.unimore.it site under the Registration heading and insert the data requested,
- after having obtained the access credentials, do the login and then click on Application for evaluation from the left-hand menu,
- subsequently, to complete the procedure connect to the link as specified in esse3 and in the guide to the application for admission,
- complete the application for evaluation, inserting the information requested.

Fees and scholarships

Min. €600 – max. €2,200. You can apply for the following benefits: 1. A scholarship with total exemption from tuition fees; 2. A reduction of tuition (for those not eligible for total exemption); 3. A financial aid for accommodation and meals. The rules and requirements for submitting the application are contained in the "Notice of Benefits for Entitlement to Study" (Bando Benefici per il Diritto allo Studio) published by ER.GO: www.er-go.it. Incoming students willing to apply for benefits are recommended to contact ER.GO at an early stage of their application to the Master, to be informed

International Economics and Public Policy

on the deadlines. You may also want to contact the International Welcome Desk for guidance on any practical issue, including applications for VISA.

“Marco Biagi” Department of Economics

The Department of Economics “Marco Biagi” located in Modena since July 2012 integrates the functions of research and teaching of the former Faculty of Economics.

The Faculty was established in 1968. It became quickly prestigious thanks to the presence of valid teachers and the quality of the studies. The reputation gained in the research and training- including post-graduation and the promotion of initiatives aimed at the territory have consolidated over time, the opportunities for collaboration with the Department’s main economic and institutional actors at local, regional, national and international level.

In the field of the research the Department may rely on an extensive network of international relations. It also cooperates with many foreign universities in various actions brought by the European Union (such as Erasmus+). Students have the opportunity to attend courses at the Universities of European and non-European countries, and to realize internships at companies and foreign institutions.

Through the Traineeship Office, the Department promotes and manages the provision of traineeships, using an established network of contacts with business associations, individual companies, professional firms, government agencies, foundations, and national and international institutions.

About UNIMORE

UNIMORE has a longstanding tradition (it was founded in 1175) and is considered one of the best universities in Italy for teaching and research. It is ranked at 2nd among public universities according to Italy’s leading financial daily. Over 27,000 students including 3,500 postgraduates, is large enough to offer all the facilities one would expect from a major university (well-stocked libraries, computer rooms, free internet connection and study support services) but small enough to retain a personal and friendly learning environment. Located in the heart of one of Europe’s wealthiest and most dynamic regions, which is world-renowned for its production of mechanical parts, engines, sports cars (e.g. Ferrari and Maserati) as well as for its agro-food sector, ceramic tiles and manufacturing industries.

UNIMORE benefits from a longstanding relationship with the area’s firms and corporations, which provide private support for university research and a unique opportunity for on-the-job training before graduation.
